

INTEGRATED ALL-ROUND SOLUTION. SIHOT.PMS

From concept to plan – we are happy to give you our advice.

Reliability Every Day

Efficient use of specific application software has become a major cost factor in the hotel industry. That is why we have developed SIHOT as a highly adaptable tool to help you maintain and improve operational efficiency.

Any hotel software provides functions such as check-in, check-out or reservations. SIHOT on the other hand, goes a lot further. This is demonstrated by ergonomic functionalities such as navigating on the room rack or in the sophisticated hyperlinks connecting the modules.

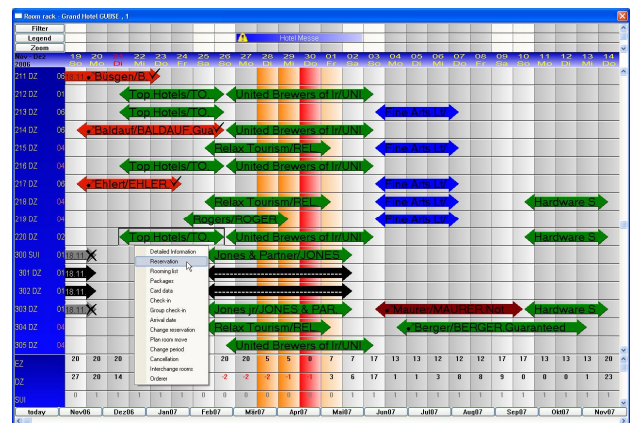

From an arrivals list you may directly access the guest profile master, reservations, guest accounts and many more functions. The result is the very comfortable handling of daily tasks.

Easy to Use

See for yourself... SIHOT is clearly structured and offers a user-friendly interface. Maintaining the master profiles requires no more than a minimum effort.

A major feature within Front Office is the room rack, from which many functions may be accessed without changing menus.

Guest accounts may be pre-set with detailed account instructions enabling a flawless check-out. Additional changes are handled efficiently by drag & drop.

Further Highlights

In your day-to-day work, you will find many useful and practical functions. Just a few are mentioned here. In order to train new staff, SIHOT provides an integrated training-hotel. The training-hotel is displayed in a different colour, and is always up to date with the live-system. Displaying photographs of rooms helps staff to allocate suitable rooms.

Another highly valued tool to respond to the changing market needs on a daily basis is the flexible set up of packages with rate assignment and manual rate options.

Total Windows Integration

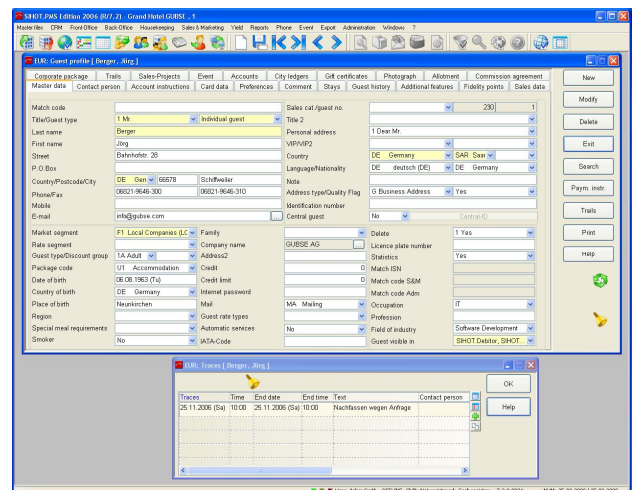

We strictly follow the Microsoft application platform, so your staff will handle SIHOT with ease. The integration includes Microsoft Word, Microsoft Excel and Microsoft Outlook.

This means, for instance, that reservation confirmations may be send to the guest directly via e-mail, after simply editing the Word template which already contains all collected information.

Technically Up-To-Date

During the night-run, all stations may continue working without timeout. The online-backup ensures the safety of your data at all times.

We support consolidation in form of a central server solution (ASP) and HQ. The development of SIHOT never stops – easily installed live updates via internet ensure that you are up-to-date at all times.

Extension by Module

Start with the basic module SIHOT.PMS and expand as required:

- >> SIHOT.Sales
- >> SIHOT.POS
- >> SIHOT.C&B
- >> SIHOT.CM
- >> SIHOT.WEB
- >> SIHOT.RMS
- >> SIHOT.CRS
- >> SIHOT.CTI
- >> SIHOT.Trust
- >> SIHOT.COMServer
- >> SIHOT.Loyalty
- >> SIHOT.Gift Certificates

Your Advantages at a Glance

- >> our experience is your profit
- >> user-friendly handling
- >> expand by modules according to your needs
- >> numerous handy extra functions for daily use
